

Evidence. Alignment. Trust. Mobility.

Powering Skills Data Mobility

Unicon helps skills-forward initiatives move from strategy to working infrastructure—so skills, credentials, and learner records can travel across education, employer, and state systems.

How We Power Skills Data Mobility

Skills data only matters when it can move. Unicon helps connect learning environments, credentials, learner records, and workforce systems so skills become portable, trusted, and usable.

Strategy

Define the roadmap, use case, governance model, and stakeholder path.

Infrastructure

Connect credentials, CLR, LMS, SIS, wallet, employer, and workforce systems.

Scale

Move beyond pilots with durable architecture and adoption support.

Let's move your mission forward.

Our Skills at Scale Roadmap

A practical path from skills-first ambition to working systems.

Who We're For

Higher education institutions

Building skills-based programs, learner records, or digital credentialing models.

Community colleges & workforce systems

Connecting learning outcomes to employment pathways and regional workforce needs.

Statewide systems & consortia

Creating shared infrastructure across institutions, agencies, and partners.

EdTech & credentialing providers

Building or integrating platforms that need to support skills data, credentials, and learner mobility.

Our Partners

Our Roadmap: From Strategy to Mobility

1

Start with the use case

Clarify the learner, employer, institution, or state problem before choosing another tool.

2

Map skills to outcomes

Connect competencies, programs, courses, credentials, and workforce signals.

3

Connect the systems

Plan how LMS, SIS, credentialing platforms, wallets, CLRs, and workforce systems exchange data.

4

Build for trust and scale

Create the governance, architecture, and adoption model needed for durable learner mobility.

Where Unicon Helps

Skills-First Strategy

Assess current systems, surface gaps, and define a practical roadmap for skills-based learning and mobility.

Credentialing Platform Readiness

Clarify credentialing platform requirements and integration paths.

Competency Framework Enablement

Help organizations implement existing competency maps and frameworks within the systems that need to use them.

Skills Data Interoperability

Connect skills, credential, and learner data across LMS, SIS, credentialing, wallet, HR, employer, and workforce systems.

Adoption & Change Support

Create shared direction across academic, technical, and workforce teams so skills initiatives can scale beyond pilot.

CLR Planning & Data Flows

Help define CLR templates, source-data needs, and the automated data flows required to support learner records.

Choose Unicon when the skills conversation needs *working systems*, not another committee.

- ✓ Moving from seat-time to competency-based education
- ✓ Aligning programs to labor market demand
- ✓ Turning a skills pilot into sustainable infrastructure
- ✓ Connecting systems that do not yet reflect what learners can actually do

Talk to us about your roadmap, architecture, credentiality strategy, or system integration needs.
